

Stormcrete® is a modular precast porous concrete system. Porous concrete slabs are manufactured and cured in a controlled environment, allowing for reproducible strength and flow characteristics. Because they arrive on site fully cured, just place them and park/drive/walk on them immediately! The permanent lifting points set into the surface of the slabs makes them removable and reusable, providing an extra factor of safety when routine maintenance isn't enough.

STORMCRETE®

Modular Precast Porous Concrete

MODULAR PRECAST POROUS CONCRETE

- Modular, removable, reusable
- Precast in controlled conditions
- Delivered cured and ready to use
- Easy to install — reduced labor
- Install year-round in any type of weather
- Provides runoff reduction within the right-of-way

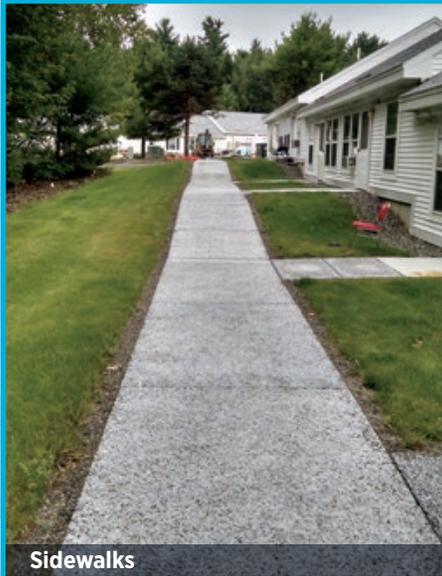

**MODULAR
REMOVABLE
REUSABLE**
